

# INTERNET CONNECTIVITY MONITORING REPORT

Report version v1.0

| Monitoring period |                            |
|-------------------|----------------------------|
| Start (UTC)       | 2026-10-06 08:21:24 UTC    |
| End (UTC)         | 2026-10-07 07:52:10 UTC    |
| Duration          | 23h 30m 45s                |
| Database          | monitor_20261006_102121.db |

## Executive Summary

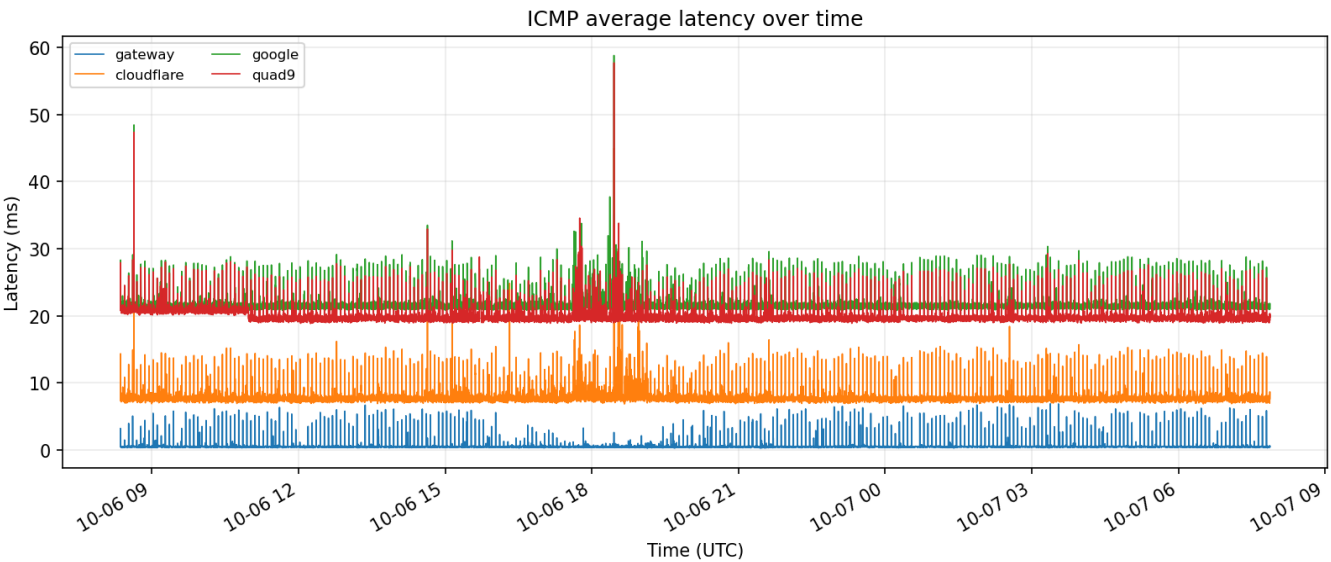

The monitoring period contains 11 confirmed target connectivity interval(s) and 11 confirmed non-NORMAL internet state interval(s).

| Metric                       | Result      | Interpretation                              |
|------------------------------|-------------|---------------------------------------------|
| Internet ICMP loss           | 0.015%      | Aggregate loss across internet ICMP targets |
| Internet ICMP availability   | 99.985%     | Successful ICMP probes                      |
| Confirmed target loss events | 11          | Closed intervals only                       |
| Confirmed degraded intervals | 11          | Closed non-NORMAL internet states           |
| DNS success                  | 7764/7764   | All configured DNS checks                   |
| HTTPS / DoH success          | 7757/7758   | All configured HTTPS / DoH checks           |
| Speedtests                   | 281/282     | Successful speedtest runs                   |
| Average download             | 919.14 Mbps | Average successful speedtests               |
| Average upload               | 314.62 Mbps | Average successful speedtests               |
| Average idle latency         | 6.45 ms     | Speedtest idle latency                      |
| Average jitter               | 0.54 ms     | Speedtest idle jitter                       |

The summary describes measured observations only. It does not establish the root cause of any connectivity problem or assign responsibility to a network provider.

# ICMP Connectivity

| Target     | Packets | Success | Loss   | Availability | Avg latency |
|------------|---------|---------|--------|--------------|-------------|
| gateway    | 50790   | 50790   | 0.000% | 100.000%     | 0.54 ms     |
| cloudflare | 50790   | 50788   | 0.004% | 99.996%      | 7.88 ms     |
| google     | 50790   | 50788   | 0.004% | 99.996%      | 21.69 ms    |
| quad9      | 50790   | 50771   | 0.037% | 99.963%      | 19.99 ms    |

The chart shows the recorded average latency of each ICMP measurement cycle. All timestamps are UTC.

## Confirmed Connectivity Events

| Target     | State   | Start (UTC)             | End (UTC)               | Duration |
|------------|---------|-------------------------|-------------------------|----------|
| quad9      | PARTIAL | 2026-10-06 15:42:25 UTC | 2026-10-06 15:42:30 UTC | 4s       |
| quad9      | FULL    | 2026-10-06 15:42:51 UTC | 2026-10-06 15:42:55 UTC | 4s       |
| quad9      | PARTIAL | 2026-10-06 15:43:15 UTC | 2026-10-06 15:43:20 UTC | 4s       |
| quad9      | PARTIAL | 2026-10-06 15:43:36 UTC | 2026-10-06 15:43:40 UTC | 4s       |
| quad9      | PARTIAL | 2026-10-06 15:50:56 UTC | 2026-10-06 15:51:00 UTC | 4s       |
| quad9      | PARTIAL | 2026-10-06 15:51:06 UTC | 2026-10-06 15:51:15 UTC | 9s       |
| quad9      | PARTIAL | 2026-10-06 15:51:20 UTC | 2026-10-06 15:51:25 UTC | 4s       |
| quad9      | PARTIAL | 2026-10-06 15:51:30 UTC | 2026-10-06 15:51:40 UTC | 9s       |
| cloudflare | PARTIAL | 2026-10-06 17:49:26 UTC | 2026-10-06 17:49:30 UTC | 4s       |
| cloudflare | PARTIAL | 2026-10-06 19:16:36 UTC | 2026-10-06 19:16:40 UTC | 4s       |
| google     | PARTIAL | 2026-10-07 03:26:21 UTC | 2026-10-07 03:26:25 UTC | 4s       |

## Internet State Events

| State    | Start (UTC)             | End (UTC)               | Duration |
|----------|-------------------------|-------------------------|----------|
| PARTIAL  | 2026-10-06 15:42:26 UTC | 2026-10-06 15:42:30 UTC | 4s       |
| DEGRADED | 2026-10-06 15:42:51 UTC | 2026-10-06 15:42:55 UTC | 4s       |
| PARTIAL  | 2026-10-06 15:43:16 UTC | 2026-10-06 15:43:20 UTC | 4s       |
| PARTIAL  | 2026-10-06 15:43:36 UTC | 2026-10-06 15:43:40 UTC | 4s       |
| PARTIAL  | 2026-10-06 15:50:56 UTC | 2026-10-06 15:51:00 UTC | 4s       |
| PARTIAL  | 2026-10-06 15:51:06 UTC | 2026-10-06 15:51:15 UTC | 9s       |
| PARTIAL  | 2026-10-06 15:51:21 UTC | 2026-10-06 15:51:25 UTC | 4s       |
| PARTIAL  | 2026-10-06 15:51:31 UTC | 2026-10-06 15:51:40 UTC | 9s       |
| PARTIAL  | 2026-10-06 17:49:26 UTC | 2026-10-06 17:49:30 UTC | 4s       |
| PARTIAL  | 2026-10-06 19:16:36 UTC | 2026-10-06 19:16:40 UTC | 4s       |
| PARTIAL  | 2026-10-07 03:26:21 UTC | 2026-10-07 03:26:25 UTC | 4s       |

## DNS Monitoring

| Target         | Tests | Successful | Failed | Success rate |
|----------------|-------|------------|--------|--------------|
| cloudflare_dns | 2588  | 2588       | 0      | 100.0%       |
| google_dns     | 2588  | 2588       | 0      | 100.0%       |
| quad9_dns      | 2588  | 2588       | 0      | 100.0%       |

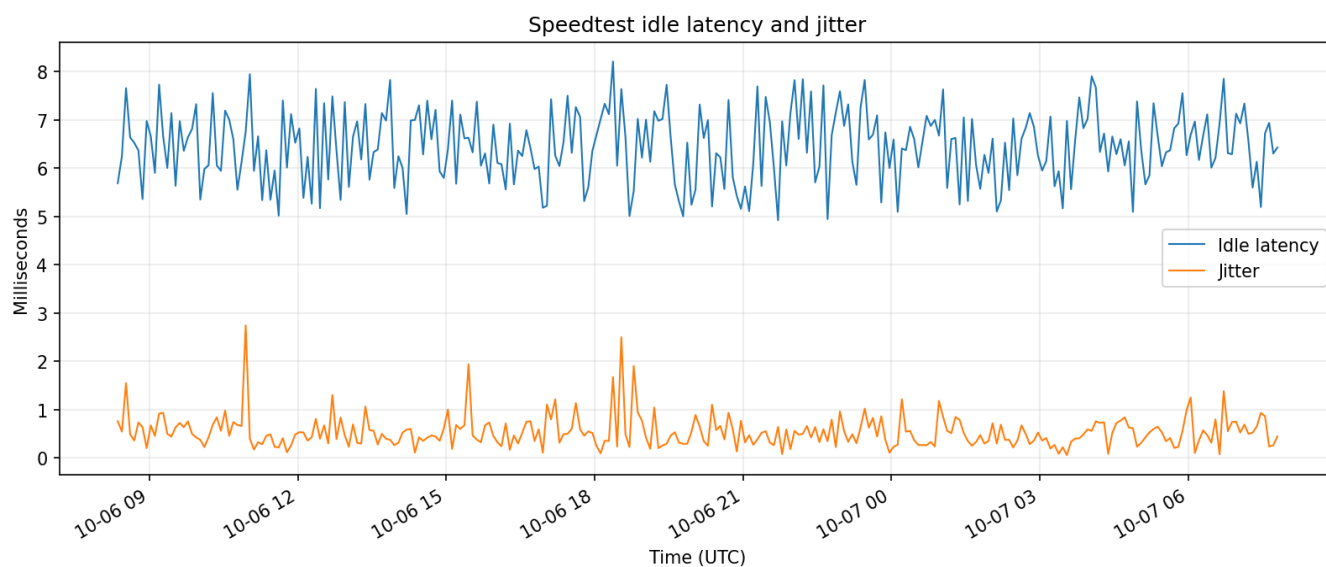

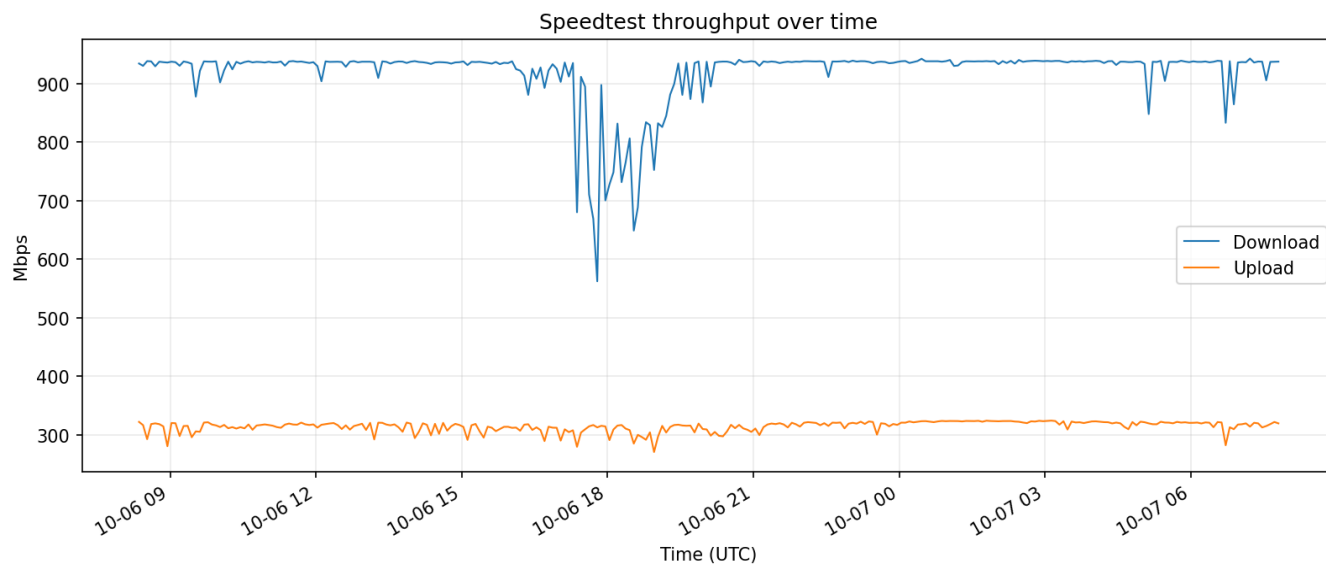

## HTTPS / DoH Monitoring

| Target           | Tests | Successful | Success rate | Avg      | Min      | Max        |
|------------------|-------|------------|--------------|----------|----------|------------|
| cloudflare_https | 2586  | 2585       | 100.0%       | 161.0 ms | 105.1 ms | 5202.6 ms  |
| google_https     | 2586  | 2586       | 100.0%       | 289.9 ms | 189.8 ms | 5288.4 ms  |
| quad9_doh        | 2586  | 2586       | 100.0%       | 132.7 ms | 102.5 ms | 10194.2 ms |

## Speedtest Analysis

281 successful speedtests were recorded. Download ranged from 562.2 to 943.0 Mbps; upload ranged from 270.4 to 324.1 Mbps.

## Technical Observations

- Packet loss to the local gateway was 0.000%, with average ICMP latency of 0.54 ms.
- The monitored internet ICMP targets recorded 0.015% aggregate packet loss and 99.985% availability.
- Successful speedtests averaged 919.14 Mbps download and 314.62 Mbps upload.
- Observed download speed range was 562.2–943.0 Mbps.
- The event parser identified 11 confirmed target interval(s) and 11 confirmed internet-state interval(s).
- ICMP packet loss, DNS failures, HTTPS results and speed measurements are observations recorded by the monitoring system. They do not by themselves establish the root cause of a connectivity problem or identify a particular provider as responsible.

## Data Source

This report was generated directly from the SQLite database produced by the Internet Monitor. The underlying measurement database is retained separately and can be used for further analysis.
